Kidney disease affects
over 30 million people in
the United States **and**
most people don't know it!

Reach Kidney Care is a community-based organization. We work to improve the health of all people with kidney disease every day.

KIDNEY EDUCATION

Reach gets to know you on a personal level; we discover what is important to you and your loved ones; and we help you manage your health in order to meet those goals. We work with your entire healthcare team from physicians and nurses to other members of your care team in your community.

How to Live Well with Chronic Kidney Disease

Good Nutrition and Exercise

Your kidneys need a healthy place to work.

- Low sodium and low cholesterol diets keep your whole body working better
- Your kidney diet may change over time
- You may need to limit your protein intake, as it creates waste that is hard to filter through your kidneys
- There are other foods that you may need to decrease or avoid as kidney function changes
- A dietician will help you learn what you need to know to eat right.
